FY 2013 Allocatee Transaction Level Report: Data Point Guidance

This document provides guidance for the Allocatee's Fiscal Year (FY) 2013 Transaction Level Report (TLR) data points.

The FY 2013 version of CIIS is CIIS 11.0

Which Loans and Investments to Include in the TLR

The reporting period for the FY 2013 TLR is the Allocatee's fiscal year ending in 2013. The TLR should include any loans, investments, and advance purchase commitments made by the Allocatee and any Sub-Allocatee(s) that were:

- Funded by Qualified Equity Investments (QEIs) and
- Outstanding at any time during the reporting period.

Include:

- Transactions that were submitted in the previous reporting period with a Transaction Status = "Active";
- Loans to and Investments in other CDEs;
- Loans to and investments in Qualified Active Low-Income Community Businesses (QALICBs); and
- Advance Purchase Commitments (categorized and reported as "QALICBs" in the TLR).

If the Allocatee is providing a loan to or an investment in another CDE, report the details of both the loan to or investment in the CDE as well as the details of the resulting funding to a QALICB(s). In other words, for each investment in a CDE, the Allocatee must report a minimum of two transactions: (1) The investment in the CDE and (2) the resulting loan or investment in the QALICB(s). The two transactions may occur during different reporting periods.

Exclude (the following are reported in the Institution Level Report (ILR)):

- Loan purchases (except advance purchase commitments);
- Financial Counseling and Other Services (FCOS); and
- Transfers of Allocation to Sub-Allocatee(s).

All data must be reported as of the reporting period end date unless otherwise noted.

Some of the TLR data points are not static from reporting period-to-reporting period (Disbursements, Principal Balance Outstanding, etc.). The appropriate response may change from day-to-day in the CDE's system. Please respond "as of" the reporting period end date.

For example, for each loan, report the principal balance outstanding and number of days delinquent on the last day of the reporting period.

QuickStart Instructions

The new "QuickStart" Instructions include basic information about CIIS 11.0 in an Excel spreadsheet. The QuickStart contains summary information that users can sort by topic. Definitions for the columns can be found on the second worksheet. The QuickStart identifies the following for all CIIS 11.0 data points:

- New data points;
- Project v. Financial Note data points (see below);
- Mandatory data points;

- Conditionally required data points (including conditional requirements);
- Compliance data points;
- Data points that are specific to Transaction Type, Purpose, Borrower/Investee Type, QLICI Type, and Special Purpose Entities; and
- Special Instructions.

The QuickStart is a supplement to this guidance and are available at www.cdfifund.gov/what_we_do/ciis.asp.

TLR “Project” Guidance

Many Allocatees are financing single Projects with more than one Financial Note (e.g., loan, line of credit, or equity investment). Allocatees will now be able to report which Financial Notes belong to a single Project. The Fund requires that each Financial Note that finances a single project have the same:

- Borrower (indicated by Client ID);
- Investee Address;
- Project Address or set of Project Addresses; and
- Total Project Cost.

Financial Note vs. Project-Level Data Points

In CIIS 11.0, each data point is designated as either Financial Note-level data or Project-level data. This designation is noted in the following guidance.

Entering FINANCIAL NOTE Data

As in past years, users will be required to enter/upload every Financial Note and the pertinent Financial Note-level data in CIIS. Financial Notes are identified by the unique “Originator Transaction ID.”

Entering PROJECT Data

Users will enter/upload a “Project Number” for each Project. CIIS will require the user to associate one or more “Originator Transaction IDs” with each “Project Number.” The Project-level data will only need to be entered one time in CIIS for each Project, regardless of the number of associated Financial Notes. (Some organizations may have only one Financial Note for each Project.) The “TLR System Instructions” (www.cdfifund.gov/what_we_do/ciis.asp) provide more technical information regarding entering/uploading data.

Multi-CDE Projects

Many CDEs are financing Projects in conjunction with other CDEs. Organizations will now be able to report which Projects were financed by multiple CDEs. Organizations can create a Multi-CDE Project Number by selecting the Multi-CDE Project link under the TLR menu of the CIIS Homepage. After selecting the link, follow the steps and CIIS will generate the Multi-CDE Project Number. The Multi-CDE Project Number can be entered in column B of the CDE TLR Projects tab.

Additional CIIS 11.0 Changes

New Data Points

- CIIS 11.0 does not include any new data points that were not present in the previous version.

Changes to Existing Data Points

- “Special Purpose Entity” has been added to the list of acceptable responses for QALICB Type.
- “None” has been removed from the list of acceptable responses for “Equity-Like Features.”
- Updates have been made to the definitions for the “Purpose” field.
- The maximum amount for Non-Real Estate Micro Enterprise loans has been updated to \$50,000.

Understanding the Data Point Boxes

Example 1:

PRJ:	Related Entity		
BH	In accordance with section 3.2 of the Allocation Agreement, report “Yes” if the investee (entity receiving the financing) is a related entity. For more information on related entities, see question #37 found in "2011 NMTC Allocation Application Q & A Document" on the Fund's website. CDE Allocatees should refer to IRC § 267(b) and 707(b) (1) and consult their own tax advisors for more information about the definition of a related entity.		
	MANDATORY DATA FIELD		
	COMPLIANCE		
	Crosswalk Values / Definitions	YES	Yes
		NO	No

Example 2:

N-I:	Interest Rate		
P	For each loan and line of credit, report the interest rate in effect at the reporting period end. If the Financial Note was paid off during the reporting period, report the interest rate at the time of the pay off. Enter the percentage as a whole number (e.g. if the Interest Rate is 2.0%, enter “2.0”).		
	CONDITIONALLY REQUIRED IF:	Transaction Type = • Term Loan • Line of Credit • Debt with Equity	
	Reject If:	Transaction Type = Equity Investment	
	Annual Update Required		
	Excel Data Format	Numeric (3 decimal places)	

Example 3:

N-I: V	Date First Payment Due If applicable, report the date the first loan payment is due. • Include interest only payments.	
	Excel Data Format	MM/DD/YYYY

Financial Note-Level or Project-Level Data Points

- Data points that are collected on the Financial Note-level are located on the “Notes-Investments” sheet (indicated by “N-I” in the Excel Column) or the “Disbursements” sheet (indicated by “Disb” in the Excel Column) of the Excel Template.
- Data points that are collected on the Project-level are located on the “Project” sheet (indicated by “PRJ” in the Excel Column) or the “Address” sheet (indicated by “Add” in the Excel Column) of the Excel Template.

Excel Column

The Excel Column is found in the second row to the left of the Data Point Box. The Excel Column refers to the sheet and column where a data point is located in the Excel Template.

The Excel Column is provided for referring, searching, and ordering data points.

- *Example 1: “Related Entity” data point is located at PRJ: BH, or Column BH of the “Project” sheet.*
- *Example 2: “Interest Rate” data point is located at N-I: P, or Column P of the “Notes-Investments” sheet.*

NEW

“NEW” appears below the Excel column for any data points that are new in CIIS 11.0.

Data Point Name

The Data Point Name is indicated in Bold in the first row of the data point box.

- *Example 1: Data Point Name is “Related Entity.”*

Guidance

Guidance for each data point is provided directly below the Data Point Name.

Mandatory, Conditionally Required, and Optional Data Fields

Mandatory data points must be reported for every Financial Note or Project. CIIS will not validate transactions that do not include the Mandatory data points.

- Mandatory data points are indicated by “MANDATORY DATA FIELD” and double bold borders around the Data Point Box (as in the *Example 1*).

- The Online entry system displays  next to Mandatory fields.

Conditionally Required If data points must be reported for a Financial Note or Project if the noted conditions apply.

- Conditionally Required If data points are indicated by “CONDITIONALLY REQUIRED IF” and a single bold border around the Data Point Box (as in *Example 2*).
- *Example 2: If the Transaction Type for the Financial Note is Term Loan, Line of Credit, or Debt with Equity, the user must provide a valid response to Interest Rate.*

Users are not required to provide responses for **Optional** data points. Optional data points are indicated by a single border around the data box (as in *Example 3*).

Compliance Data Points

Compliance data points may be used to measure the Allocatee's compliance with their Allocation Agreement. Any field that may be used for compliance purposes for any Allocatee is identified as a Compliance data point. Allocatees must refer to their specific Allocation Agreement(s) to determine if the data point is relevant to their CDE's compliance.

- Compliance data points are indicated by "COMPLIANCE" and blue shading (as in *Example 1*).
- The Online entry system displays a  next to Compliance fields.

Reject If

CIIS will generate an error message if a response is provided when a "Reject If" condition applies. "Reject If" is intended to eliminate responses that do not make sense: for example, providing an interest rate for an equity investment. When a "Reject If" condition applies, the user should leave the response blank.

- *Example 2:* If the Financial Note is an Equity Investment, CIIS will not accept an Interest Rate entry.

Validations

In order to certify and submit the TLR, the data must pass a number of validation rules. Validation rules are provided in the data boxes.

Annual Update Required

CIIS requires users to update certain data points each year if they have changed since the previous reporting period. These data points are noted with "Annual Update Required" in a yellow box.

- *Example 2:* Users are expected to update the Interest Rate annually if the rate has changed from the end of the previous reporting period.

Excel Data Format

The Excel Data Format describes the required format to upload the Excel Template. In general, users should refer to the Excel Data Format to determine the type of data CIIS requires.

- *Example 2:* CIIS will accept numeric entries with up to three decimal places.

Crosswalk Values/ Definitions

The Crosswalk Values / Definitions provides the valid CIIS responses for data points that are not numeric or open-ended text.

- *Example 1:* "Yes" and "No" are valid responses. CIIS will accept the values of "YES" and "NO".
- XML and Excel uploads: Values will be indicated in the Crosswalk.
- Manual Entry: Values appear in the dropdown menus.

Project & Financial Note Identifiers

N-I: A	Submitter Transmission ID XML and Excel Template users may use the Submitter Transmission ID to distinguish multiple data files uploaded to CIIS. <ul style="list-style-type: none"> XML Interface - Include a value for the SubmitterTransmissionId attribute in the Transmission element. Addresses

Address Guidance

Users must report one Investee Address and one or more Project Addresses. Users may provide the same address for the Investee Address and Project Address, if appropriate. Users will be prompted to enter a FIPS code or X, Y Coordinates for addresses that are not geocodable in CIIS.

- Investee Address/FIPS Code refers to the investee's/borrower's address. Investee Address is the business address when the borrower is a business.
- Project Address/FIPS Code refers to the location of the business or other real estate for which the loan or investment is being used. For business investees/borrowers, if the Project Address is different from the Investee Address please provide the Project address. If the loan or investment is funding multiple projects at different locations please provide the address of each location.
- FIPS Code refers to the 11-digit Federal Information Processing Standards codes that indicate state (first 2 digits), county (next 3 digits), and census tract (last 6 digits). FIPS codes must be provided if CIIS is unable to geocode an address. For additional information about FIPS codes, visit www.census.gov/geo/www/fips/fips.html.
- X, Y Coordinates specify an exact geographic location using longitude and latitude. The X-coordinate refers to longitude. The Y-coordinate refers to latitude. For the United States and most of its territories, longitude (i.e. X-coordinate) is negative and latitude (i.e. Y-coordinate) is positive. XY Coordinates should not be rounded. CIIS requires that both the coordinates be reported to five (5) decimal points.

Example of X- and Y-coordinates:

X-coordinate: -103.85272 ← Longitude

Y-coordinate: 44.67451 ← Latitude

Longitude and latitude can be found using a variety of tools, such as using a Global Positioning System (GPS), an address locator, or a map-based tool. The Fund offers the following suggestions:

CDE Project Address Guidance

Business Loans/Investments with More than One Project Address

- If the investee/borrower qualifies as a QALICB, the user should provide only one Project Address that represents the borrower's address.
- If the borrower/investee does not qualify as a QALICB, but elects to satisfy the QALICB requirements utilizing the "Portions of Business" rule under the IRS regulations, the user should provide a Project Address for each business location financed by the loan(s) or investment(s). Please refer to the IRS regulations for guidance on qualifying businesses as QALICBs under the "Portions of Business" rule.

Real Estate Loans/Investments with More than One Project Address

- If the project site or sites include multiple buildings or addresses that are contained within a single census tract, the user should provide one Project Address for the development.

- **If the project site or sites are not completely contained within a single census tract, the user should provide one Project Address for each census tract financed by the loan(s) or investment(s).**

During the TLR address verification process, CIIS will attempt to geocode each address (identify the location on a digital map). CIIS will notify the user of each transaction address that the system was not able to geocode, if any.

- CIIS cannot geocode post office box (PO Box) or rural route (RR) street addresses.
- CIIS cannot geocode rural or “new” addresses that are not available in the geocoding database.

The Fund recommends that organizations confirm that all addresses are geocodable in CIMS (the Fund’s CDFI Information and Mapping System) prior to reporting in CIIS.

This extra step will save the organization time and effort in the reporting process. CIMS is available through the “Mapping” link in your organization’s myCDFIFund account. For more information about CIMS, please visit www.cdfi.treas.gov/mapping.

If you receive an address verification error in CIIS:

1. Correct errors in the Address – CIIS will allow the User to “Update” the transaction and provide a corrected address.

- Check the address for typos. Make sure that the spellings are correct and remove any uncommon abbreviations.
- Please make sure that you have entered the correct address. If necessary, review the loan/investment documentation or contact the borrower.

2. Enter a FIPS Code or X, Y Coordinates

- If you are unable to provide a geocodable address, CIIS will require Users to enter a FIPS Code or X, Y coordinates.
- Manual Entry / Excel / XML Entry
 - Users must provide an address, validate, and receive a geocoding error before CIIS will provide a field for FIPS code or X, Y coordinates. **NOTE:** A FIPS Code or X, Y coordinates can only be provided by updating your transaction(s) ONLINE.
- There is no FIPS or X, Y coordinates field in the Excel Template or XML schema.
- Users must provide both an address and a FIPS code or X, Y coordinates for un-geocodable addresses using the manual entry.

The 11-Digit FIPS

CIIS collects an 11-digit FIPS:

- **State:** The **first two digits** of the FIPS represent the state.
 - A list of state codes is available at: www.census.gov/geo/www/cenpop/statecenters.txt
- **County:** The next **three digits** of the FIPS represent the county.
 - A list of county codes available at: www.census.gov/geo/www/cenpop/county/ctyctrpg.html
- **Tract:** The last **six digits** of the FIPS represent the census tract.
 - The directions below provide one option for identifying the census tract using the U.S. Census Bureau’s website.
 - If only four digits are provided for the census tract code, add two zeros after the tract number.
 - If only three digits are provided for the census tract code, add one zero before the tract number and two zeros after.
 - If only two digits are provided for the census tract code, add two zeros before the tract number and two zeros after.

How to Obtain a Census Tract for the FIPS Code

The Fund offers the following suggestion for obtaining a FIPS for addresses that cannot be geocoded in CIIS:

- Visit the U.S. Census Bureau's website at www.census.gov.
- Select "American Fact Finder" from the left column of the Census Bureau's Homepage.
- Select the "street address" hyperlink from the right under "Address Search..."
- Enter the specific address and click the "Go" button.
 - If the census is unable to geocode the address, you will need to enter the address of a nearby site.
 - Continue to enter nearby addresses until the Census website is able to geocode the address.
- Select "Census Tract" from the list of geographic options and select "Map"
- Select "Census Tract" under the Geographies
- Click on a selection tool to select a section within the map
- The Census Tract will display under select geographies.
- To display the census tract on the map, select "Boundaries and Features" and place a check-mark next to Census Tract for Boundary and Label and click on update
- Please print out a copy of the map for future reference.

How to Obtain XY Coordinates

The Fund offers the following suggestions for obtaining XY Coordinates for addresses that cannot be geocoded in the Community Impact Mapping System (CIMS).

ESRI's Address Locator:

- 1) Visit:
http://tasks.arcgisonline.com/ArcGIS/rest/services/Locators/TA_Address_NA/GeocodeServer/findAddressCandidates
- 2) Enter the address, city, state, zip code, and country.
- 3) Click "Find".
- 4) Review the Address Candidates and identify the Address Candidate with a "Match_addr" that most closely matches the address entered and/or with the highest "Score".
- 5) Note the X-coordinate and Y-coordinate. (Remember that XY Coordinates should not be rounded and that CIIS requires that both the coordinates be reported to five (5) decimal points.)

ESRI's Map-Based "Latitude-Longitude Finder" Tool:

- 1) Visit: http://edcommunity.esri.com/maps/geocoder/AGS_EdComm_Geocoder.html
- 2) Search by address of physical location or zoom to physical location.
 - 2a) Search by Address of Physical Location:
 - Enter address, city, state, and zip code information.
 - Click "Find Address".
 - Zoom in to verify that the crosshair is located over the exact physical location of the address. (It may also be helpful to select "Imagery" from the "Base Maps" dropdown menu to view a satellite image of the location.)
 - 2b) Zoom to Physical Location:
 - Center the crosshair over the approximate location of the physical location.
 - Zoom in and verify that the crosshair is located over the exact physical location of the address. (It may also be helpful to select "Imagery" from the "Base Maps" dropdown menu to view a satellite image of the location.)
- 3) Note the X-coordinate (longitude) and Y-coordinate (latitude). (Remember that XY Coordinates should not be rounded and that CIIS requires that both the coordinates be reported to five (5) decimal points.)

For the purposes of completing the Business Strategy section and all relevant exhibits, financing provided to real estate *Qualified Active Low Income Community Business (QALICB)* refers to entities whose predominant business activity is the development (including construction of new facilities and rehabilitation/enhancement of existing facilities), management or leasing of real estate.

Transactions with *QALICBs* whose predominant business activity includes all other types of business activities should be classified as non-real estate businesses regardless of: 1) how the business intends to use the proceeds of the transaction; or 2) whether the business intends to use any real estate owned as collateral for a loan.

For example, if an *Applicant* provided a loan to a childcare provider for the purpose of purchasing the property where the childcare center would be housed, the *Applicant* would categorize this loan as a non-real estate transaction. However, if the *Applicant* provided a loan to a real estate development company whose predominant business is the development of community facilities, for the purpose building a childcare center, this loan would be considered financing a real estate transaction.

Notwithstanding the above, loans or investments made to a special purpose entity that is *Controlled* by or under common *Control* with an operating company, and that was set up specifically to lease the property back to the operating company such that the operating company is the principal user of the property, may be classified as either a "real estate *QALICB*" or a "non-real estate *QALICB*", at the discretion of the *CDE*. An operating company is considered the principal user of the *QALICB's* property if it is the occupant of a majority (i.e., greater than 50%) of the rentable square footage of the *QALICB's* property. The *QALICB* may lease the balance of its property to one or more third parties.

PRJ:	NMTC Eligibility Criteria		
BF	Report which geographic criteria qualifies this transaction as a NMTC eligible transaction. If you select "'2006-2010 American Community Survey" (ACS) this may apply to a QLICB closed on or after May 1, 2012. In addition, the CDFI Fund will allow current NMTC allocatees to use either 2000 census data or 2006-2010 ACS data applied to the 2010 census tracts to qualify QLICBs closed between May 1, 2012 and June 30, 2013. Finally if you select "Census 1990", the transaction must have been closed by a specific date outlined in section 3.2 of the Allocation Agreement.

Additional Guidance on reporting Multi-CDE Project Numbers

Overview: Many CDEs are financing Projects in conjunction with other CDEs, allocatees and sub-allocatees. Organizations will now be able to report which Projects were financed by multiple allocatees and sub-allocatees. Organizations can create a Multi-CDE Project Number by selecting the Multi-CDE Project link under the TLR menu of the CIIS Homepage. After selecting the link, follow the steps and CIIS will generate the Multi-CDE Project Number. The Multi-CDE Project Number can be entered in column B of the CDE TLR Projects tab.

- A response to the Multi-CDE project number requirement is mandatory for any CDE projects.
- *CIIS allows organizations to create Multi-CDE Project Numbers at any time regardless of where an organizations is in the reporting process (in progress or submitted). Organizations can access the Multi-CDE Project Number creation page any time to establish a new Multi-CDE Project Number. If you have any questions please call the CIIS Help Desk at either of the following: (703) 373-1516 or ciishelp@kearneyco.com.*
- *CIIS TLR Reporting System Enhancements will become operational by EOB March 25th, 2013.*
- *Two responses are provided in the drop menu: “Multi-CDE Project Number” and “Not Applicable.”*
- *When applicable after 12/31/2011 a Multi-CDE Project should be reported for the new project when the initial investment is closed.*
- *Projects that are funded by a single CDE should provide a response of “Not Applicable” in the “Multi-CDE Project Number” field of the TLR.*
- *Generally, a project originated prior to 1/1/2012 should NOT be reported as a Multi-CDE project even though it may have been a Multi-CDE project. **The only instances in which a project originated prior to 1/1/2012 should be reported as a Multi-CDE Project is when project’s costs cannot be disaggregated between reporting phases and some of the participating CDEs’ Qualified Equity Investments would be comingled between project phases.***
- ***Treatment of Multi-CDE Projects involving distinct phases:** In instances where a Multi-CDE project occurs at an address or location where a NMTC financed project was previously funded, the succeeding phase may be construed as a new and distinct project if and only if the total project costs can be disaggregated between reporting phases and none of the participating CDEs’ Qualified Equity Investments would be comingled between project phases. Moreover, if there are different QALICBs in these separate phases it should be straightforward to separate costs and impacts between phases.*

- ***To address instances of Multi-CDE projects prior to 1/1/2012 the CDFI Fund will publish the TLR historical data which will include a provisional list of Multi-CDE projects. This list will provide a first iteration for identifying Multi-CDE project. At a later date the CDFI Fund will issue guidance on providing edits to this list to develop a consensus list; this approach to identifying Multi-CDE projects in the historical data entails less complexity than attempting to link the historical records through the TLR reporting system.***

1. The following instructions are provided on the use of “Lead” and “Collaborative” CDE approaches for administering and reporting a multi-CDE project:

Lead Approach – Please select this option if a CDE (or allocatee or sub-allocatee—which hereafter will be referred to as the organization) has been designated by all participating organizations as the initiating organization to create, enter and edit the applicable Multi-CDE Project information. The Lead CDE coordinates the multi-CDE project data to report the total project costs (making sure that it includes all sources of financing for all participating organizations as detailed in reporting fields PRJ:C-F), the project address, and the total number organizations participating and their respective TINs (see TLR enhancement 1 below).

- Please note that the multi-CDE table which assigns the Multi-CDE project number is a separate reporting table used to link multiple transactions across participating organizations. The multi-CDE table is not meant to collect the data on the individual transactions of participating organizations which must still be reported separately in the TLR by each organization. In addition the Lead CDE should ensure that all participating organization uses the same business description, 6-digit NAICS code for the project.
- The “initiating” or “registering” organization **WILL** be automatically listed as a participant in the ‘Multi-CDE Project Table’.
- Under the Lead CDE approach all participating organizations should report the same impact data based upon the total impact of the project, for each relevant outcome measure in TLR fields PRJ:Z –PRJ:BC, including projected and actual job measures, square footage, annual gross revenue generated by QALICB, etc. (The source(s) and method(s) of computing jobs should be agreed upon).
- Differing fiscal year end (FYE) for participating organizations: It is recognized that not all participating organizations will have the same FYE to estimate outcome data for the Multi-CDE project; however slight differences in outcome reporting will average out over the life of the project. Please use the most recent available outcome data even if the end-of-fiscal-year dates vary among organizations.
- The rationale for using the same outcome numbers for TLR reporting is that every organization will report the aggregate impact and the CDFI Fund can then count the impacts once for each identified multi-CDE without risk of double counting.

Collaborative Approach – Please select this option if all participating organizations should be able to edit the Multi-CDE Project information.

- Under the Collaborative approach, the organizations agree to report in the Multi-CDE project table the total project costs (making sure that it includes all sources of financing for all participating organizations as detailed in reporting fields PRJ:C-F), the project address, and the total number participating organizations and their respective TINs (see TLR enhancement 1 below).

FY 2013 Allocatee Transaction Level Report: Data Point Guidance

- Please note that the multi-CDE table which assigns the Multi-CDE project number is a separate reporting table used to link multiple transactions across participating organizations.
- The “initiating” or “registering” organization **WILL** be automatically listed as a participant in the ‘Multi-CDE Project Table’.
- All participating organizations should report their individual outcome data based on their organization’s detailed data collection on their specific contribution to the project.
- **If the participating organizations do not collect discrete breakouts of outcome data for each organization’s contribution to the project outcomes, then the organizations should use a pro-rata share of relevant outcomes as measured by each organization’s share of all QEIs in the project.** It is recognized that prorating outcomes based on the share of total QEIs does not account for the non-New Markets financing portion of the project; however the collection of the detailed breakout of total project cost components will allow the CDFI Fund to make this calculation in analyzing project leverage and the attribution of outcomes.
- Outcomes that should be prorated include all job measures (PRJ: AB-PRJ: AI); and square footage, housing units, community facilities and capacity measures (PRJ: AL-PRJ: BC). The source and method of computing jobs should be agreed upon.
- As in the lead approach the multi-CDE table is not meant to collect the data on the individual transactions of participating organizations which must still be reported separately in the TLR by each organization. In addition all participating organizations must use the same business description, 6-digit NAICS code for the project.
- The rationale for this approach was that some organizations desire to report discrete outcomes related to their individual investments. Moreover under the collaborative approach the reporting effort is distributed across all organizations identified in the multi-CDE project.
- **A key performance measurement objective for collaborative CDE reporting is that the sum of individually reported outcomes should equal the estimated total outcome of the project so that there is no double counting of outcomes.**

CIIS TLR Reporting System Enhancements:

The system enhancements listed below will become operational by EOB March 25th, 2013.

1. A Drop down will be added to the Multi-CDE creation page that requires users to enter the number of organizations participating in the Multi-CDE Project.
 - An entry for the “Number of Participating Organizations” will require that value match the number of organization entries identified when initiating the Multi-CDE Project Number. If the number does not match the actual number of entries of participating allocatees and sub-allocatees entered in the drop-down box, the system will not generate a Multi-CDE project number.
2. The system will send an email to all participating organizations when updates are made regarding the setup of the multi-CDE project.

3. The system will CC the Help Desk on all emails.
4. The system will continue to use the TIN as the identifier when adding all participating organizations that have a QEI in the project. For reasons of confidentiality CIIS cannot provide a list of TINs for allocatee or sub-allocatee.
5. If an organization has already submitted a TLR and needs to change an answer based on these new instructions, they will have to request that the Help Desk set the TLR to 'Open' and then they will be able to make a change in Multi-CDE Project Number.
